Materials of this conference were published in three issues general type. Individual articles of permafrost (present work), permafrost studies, engineering aspects of permafrost (present work), and ground physics and mechanics. Individual articles of this work discuss basic problems of planning, building, and operating various buildings and structures in permafrost regions. Some of the information reported, particularly on hydraulic engineering construction, is new and appears for the first time in the literature on permafrost. Articles are accompanied by references.</p> <p>Ushatov, V. P.
